

THE MOST UNIQUE AND RELIABLE RESOURCE FOR TODAY'S ELECTRICAL CONTRACTOR

THE ELECTRIC CURRENT

Klein Tools® Combines Two Products for Easy to Use Testing Kit at Great Value

AstroNova
Announces 8-Channel Input
Module for Bridge, Current,
Voltage, and IEPE Measurements

First there was 4 square...
and now the **REVOLUTIONARY 5 Square® Box!!**

You've struggled with 4 Square boxes for years - you know how small, cramped and time consuming they are. Finally, there is a solution that allows you the space you have always needed.

The **5 Square® Boxes** (5" x 5" x 2-7/8") provide up to 88 in³ of interior volume which more than doubles that of most existing boxes on the market.

Create a robust and unrivaled infrastructure for the life of your facility with the **5 Square® Products!**

Fire Signal

- TWICE THE VOLUME AS MOST BOXES
- SAVE LABOR...INCREASE PROFITS
- ELIMINATES TROUBLESHOOTING TIME AND COST
- FULLY UPGRADEABLE SYSTEM
- SPECIFIED BY ENGINEERING FIRMS, HOSPITALS, UNIVERSITIES & GOVERNMENT AGENCIES
- AVAILABLE IN ZINC OR RED

Telecommunications

- INTEGRAL CABLE MANAGEMENT
- SAVE LABOR...INCREASE PROFITS
- FACILITATES MIN. BEND RADIUS REQUIREMENTS
- SUPPORTS CURRENT AND EVOLVING SYSTEMS
- SUPPORTS PoE PLUS
- SPECIFIED BY ENGINEERING FIRMS, HOSPITALS, UNIVERSITIES & GOVERNMENT AGENCIES

REPAIR CONDUIT IN A SNAP!

- No Tape
- No Plastic Straps,
- No Metallic Straps

NO KIDDING!

Designed especially for
power, communications,
and fiber optics

AstroNova Announces 8-Channel Input Module for Bridge, Current, Voltage, and IEPE Measurements

New sensor input module provides flexibility and higher channel density to reduce cost of test

AstroNova® Test and Measurement expands its line-up of input modules with the release of the IBIV-8 module for Daxus® DXS-100 and SmartCorder® DDX-100 data acquisition systems. With internal bridge completion, shunt calibration, and support for the most common bridge resistance values, the IBIV-8 is ideally suited for bridge-based sensors and strain measurements. The IBIV-8 also offers unparalleled flexibility allowing users to perform a variety of measurements in a single module.

Offering eight input channels, the IBIV-8 reduces the cost per channel by as much as 38% versus existing modules and competitive offerings. Available with 10-pin Lemo or D-Sub connectors, the IBIV-8 simplifies wiring, and built-in hardware-based counter and timer functions eliminate the need for additional hardware.

Product features include:

- Simultaneous sampling at up to 100 kS/s/ch
- 5 measurement ranges (+/- 10 V, +/- 2 V, +/- 200 mV, +/- 50 mV, and +/- 20 mV)
- Full 24-bit resolution across selected measurement range
- High accuracy (+/- 0.03% for 10V, 2V and 200 mV attenuator settings)
- Supports 120, 350, 500, and 1000W bridge resistances
- Software selectable Internal $\frac{1}{4}$ and $\frac{1}{2}$ bridge completion (120 and 350W) and shunt calibration
- 10-pin Lemo or D-Sub connector options
- Built-in counter and timer functions

All AstroNova Test and Measurement products are designed and manufactured in the USA and supported by a global team of engineers.

To learn more about the IBIV-8 module and the Daxus & DDX data acquisition system capabilities, visit: <https://tm.astronovainc.com/products/data-acquisition-systems/>

Making perfect connections has never been simpler. In fact, now it's a **SNAP!**

NEW *SNAP* Connectors from Greaves. A revolutionary compression connector concept that gets the job done with just a few turns of a standard wrench!

- ▶ Time-saving, easy installation
- ▶ Superior pull-out strength and conductivity
- ▶ No bulky and costly tools and dies

GREAVES

Klein Tools® Combines Two Products for Easy to Use Testing Kit at Great Value

Klein Tools (www.kleintools.com), for professionals since 1857, introduces a new Electrical Tester Kit, combining two essential tools for electricians, the NCVT-5A Dual Range Non-Contact Voltage Tester with Laser Pointer and the RT210 GFCI Receptacle Tester, at a great price point.

Electrical Tester Kit with Dual-Range NCVT and GFCI Receptacle Tester (Cat. No. NCVT5KIT) NCVT-5A

- Dual-range non-contact tester detects AC voltage from 12 to 1000V (70 to 1000V and 12 to 1000V ranges)

The Bright Idea S2 LED Bulb

is the LED solution you've been waiting for

Let's be real. A light bulb isn't just a light bulb...

Replace old HID lamps with the new LED S2

From public safety to maintenance needs, this bright, flexible and inexpensive LED Solution reduces headaches across the board.

Simply source the latest in outdoor lighting technology from the best lighting source. And, the most trusted distributor of the Brex Lighting® S2 LED Bulb.

WE HAVE THE ROPE TO GET THE JOB DONE.

- Bright, integrated laser pointer for identifying objects of interest on the jobsite
- Delivers simultaneous visual and audible voltage indicators when AC voltage is detected
- Lightweight, compact tool with pocket clip for easy storage and quick access
- Built to withstand a 9.9 foot (3m) drop
- CAT IV 1000V safety rating RT210
- Detects the most common wiring problems in standard and GFCI receptacles
- Works on GFCI outlets and confirms operation of the ground fault protective device
- Built to withstand a 6.6 foot (2m) drop

“In putting this kit together, we wanted to give trade professionals two essential tools at a great value,” said Sabrina Kalsi, product manager at Klein Tools. “The NCVT-5A is a dual-range non-contact voltage tester with integrated laser pointer. The dual-range tester features a bright Class 3a laser that enables the user to highlight objects on the jobsite at far distances making it perfect for working on sites from small residential developments to large-scale commercial endeavors. Paired with the RT210 receptacle tester, this is the perfect kit for electricians, facilities and maintenance professionals, and construction workers.”

ENGINEERED, TESTED & CERTIFIED

A Tethered Tool System for Applications Involving Work at Height

LEAVE IT TO THE EXPERTS

Snap-on provides a drop prevention system like no other.

We'll work with you to determine your drop prevention needs... including the tools, attachment points, lanyards, pouches, and holsters, that combine to create a turnkey solution that enables your workers to do just that...WORK.

SAVE TIME AND MONEY

Engineered attachment points don't interfere with the functionality of the tools, and are more durable than simple "add-ons" that require frequent maintenance or replacement.

BEAT THE STATISTICS

About 70% of drops happen during the exchange of the lanyard from one tool to another. The Snap-on Tools@Height system features independent tethering, which means each tool is attached to its own lanyard. Minimizing exchanges reduces the likelihood of drops and increases safety.

MINIMIZE RISK

Independent tethering also allows the tool to be removed from and returned to its holster or pouch using just one hand. Safety is improved by allowing the user to maintain the critical "three points of contact" when working at height.

RETAIN CONTROL

Our modular approach means you can configure the tools/holsters based on a user's personal preference, while providing a system that meets your safety standards.

See what the most comprehensive tool drop prevention solution in the industry can do for your team's safety and productivity by contacting:

INDUSTRIAL

BitFlow Shipping its First CoaXPRESS 2.0 Frame Grabber

*New Claxon-CXP4 doubles transmission speeds of previous CoaXPRESS standard,
Offers full feature set of CoaXPRESS 2.0 specification*

For over two decades, BitFlow has been known for pushing the limits of what a frame grabber could do in machine vision systems. Today, BitFlow pushed those limits even further by shipping its new Claxon-CXP4, a quad CoaXPRESS-12 PCIe Gen 3 frame grabber that accelerates video transmission speed to 12.5 Gb/s -- or twice as fast as the current CXP 1.1 standard. Now in full production, the new frame grabber will be shipping this month and available through BitFlow's international distributor network.

"While the Claxon is not the first CXP 2.0 frame grabber on the market, it is certainly one of most stable and feature-rich, since our engineering team built the full CXP 2.0 specification into it rather than pick and choose what capabilities the customer was permitted to use," said Donal Waide, Director of Sales, BitFlow, Inc. "A machine system designer can only experience the full potential of CXP 2.0 performance by having access to all its capabilities, which they do with the new Claxon. It guarantees BitFlow customers will be thoroughly ready for the increased data demands the latest generation of high-resolution, high-speed cameras in complex high-speed industrial, military and medical applications."

Despite doubling its speed, BitFlow engineers kept the overall architecture of the Claxon-CXP4 identical to the company's previous generation Cyton CXP-6 frame grabber, allowing users to easily swap-out slower CXP 1.1 cameras with more powerful CXP-12 or CXP-10 cameras without major software changes or system downtime. It accommodates capture from up to four CXP-12 or CXP-10 cameras simultaneously, plus has high speed inputs and outputs to support an array of sensors and motion encoders. With four cables and four CXP-12 cameras, the maximum data transfer rate is 5 GB/S, the highest data acquisition rate in the industry today, even at cable lengths up to 40 meters.

By harnessing the speed of CXP 2.0, the Claxon-CXP4 accelerates uplink to 41.6 Mbps, a benefit that enables a host to send triggers to a camera at rates of 600 kHz in single trigger mode or almost 300 kHz in dual trigger mode, all without requiring a dedicated high-speed uplink cable. Performance is also improved by the frame grabber's use of Micro BNC connectors which are more robust and run at higher speeds than traditional DIN 1.0/2.3 connectors. A heartbeat packet has also been added which supports time synchronization of multiple cameras, along with the ability to host event packets so that asynchronous messages can be sent from the camera.

Adding the Claxon-CXP4 to an application is simplified by the BitFlow SDK supporting 32-bit and 64-bit operating systems, or by downloading free drivers from the company's website for 3rd party machine vision packages. Applications can be developed using C/C++/.NET and the company's sophisticated buffer management APIs. The software included with the Claxon-CXP4 is compatible with all other BitFlow frame grabbers, making the pivot from Camera Link to CXP fast and trouble-free.

For more information, please call 781-932-2900 or visit www.bitflow.com.

About BitFlow

BitFlow has been developing reliable, high-performance Frame Grabbers for use in imaging applications since 1993. BitFlow is the leader in Camera Link frame grabbers, building the fastest frame grabbers in the world, with the highest camera/frame grabber densities, triggering performance, and price. With thousands of boards installed throughout the world, into hundreds of imaging applications, BitFlow is dedicated to using this knowledge and experience to provide customers with the best possible image acquisition and application development solutions. BitFlow, located in Woburn, MA, has distributors and resellers located all over the world including Asia, the Americas, and Europe. Visit our website at <http://www.bitflow.com>.
