VIVOTEK Offers License-Free Smart VCA Package Upgrade Support with MS9321-EHV Network Camera

The 20MP MS9321-EHV Multiple Sensor Network Camera Can Monitor Full 180 Degree Horizontal Views, Delivering the Highest-Quality Comprehensive Coverage, Making it an Ideal Outdoor Surveillance Solution with Excellent Image Details

VIVOTEK (TWSE: 3454), the global leading IP surveillance solution provider, is proud to announce that by upgrading to the VCA package version 6.6 for its MS9321-EHV 20MP 180 degree panoramic network camera with VAST 2 technology, users are provided VIVOTEK's Smart VCA package free-of-charge without the need for a license.

“Featuring 4 x 5MP CMOS sensors at 30fps at all resolutions, the MS9321-EHV multiple sensor network camera can monitor full 180 degree horizontal views and deliver the highest-quality comprehensive coverage, making it an ideal outdoor surveillance solution with excellent image details,” said David Liu, President of VIVOTEK USA, Inc. “Like its predecessor the MS8391-EV, the MS9321-EHV has the Video Alignment feature that allows you to adjust the positioning and image quality of each sensor, enabling users to view a seamless picture, with no repetition.”

The version 6.6 VCA package includes a suite of seven video analytic rules/functions:

- Intrusion detection

- Loitering detection
- Line crossing detection
- Unattended object detection
- Missing object detection
- Face detection
- Crowd detection

Along with Trend Micro IoT Security and a weather-proof IP66-rated and vandal-proof IK10-rated housing, integrated Smart IR II technology with adaptive IR enables the MS9321-EHV's 30M 180 degree IR illuminators to adjust to the scene together or individually to provide the best possible IR image, reducing glaring hotspots and/or underexposed dark spots. With WDR Pro (120dB), the MS9321-EHV captures both the dark and bright areas of an image and combines them to create a highly realistic representation of the original scene. Lastly, combining both H.265 and VIVOTEK Smart Stream III, the MS9321-EHV can reduce bandwidth and storage consumption more than 90 percent (depending on scenes) compared to traditional H.264 without smart streaming.

About Platinum Tools

Platinum Tools LLC, an NSi Industries company, was created based upon two very simple objectives. First, develop the absolute best possible solutions for the preparation, installation, and hand termination of wire and cable. Second, implement an operational infrastructure that can deliver these products in an efficient, timely, and high quality manner.

All of our products must absolutely satisfy three critical benchmark criteria...utility of function; quality of function; and economic value. Our people are our company. They, too, must be focused on and work to satisfy three critical benchmark criteria...customer satisfaction; product knowledge and expertise; and willingness to learn and adapt.
